

REPORTS

HAVANA, February 4.—The report originating in Key West that 300 Cubans had been massacred by the Spaniards in the excitement growing out of the Cuban affair, is false. As previously reported, two men were shot in this city, Wednesday night, and these are the only cases of retaliation which have occurred.

HAVANA, February 7.—General Gaye has returned to Puerto Principe, and reports capturing two pieces of artillery and many prisoners. In sugar there is little business doing, and prices barely maintained.

MADRID, February 7.—It is reported that the treaty between Spain and the Spanish republics will be signed immediately.

PARIS, February 7.—General Heine departed for Panama, to conduct the Darien Ship Canal explorations.

The Marcelline, Henry Rochefort's journal, appears this morning with a characteristic article on the signature of Rochefort himself, relative to the recent notice ordering him to consider himself a prisoner in obedience to the sentence of the Court. He declares boldly he will not surrender himself, and if the ministers want him, they must come and take him; and furthermore, they must come prepared to use force.

The new postal arrangements with the United States apply only to pre-paid matter.

VALENTIA, IRELAND, February 7.—The Irish telegraphs Eastward are cut off.

Washington News.

WASHINGTON, February 7.—Bullock leading one and Bryant another Georgia delegation, have arrived. Both claim to be Republicans.

Hoar is to be retained in the Cabinet. Peter T. Washburn, Governor of Vermont, is dead.

3 P. M.—The House is discussing a resolution, that the tariff should be for revenue and not for protection. Senator Morton presented documents declaring Georgia had adopted the fourteenth and fifteenth amendments.

In the House, Ridgeway introduced a bill to repeal the Act prescribing oaths of office, and a bill for the removal of the political disabilities of the people of Virginia. Walker introduced a bill to continue the Freedmen's Bureau. The resolution offered on Monday last, declaring that constitutional authority to levy taxes does not include any power to impose duties other than for the collection of revenue, and that the tariff levied for any other purpose than that of revenue, especially if levied to foster and encourage one section of the country or one class of citizens at the expense of another section or class, is unwarranted by the Constitution, unjust to the great body of the people and injurious to almost all industries, and directing the Ways and Means Committee to prepare a bill accordingly, was laid on the table by a vote of 89 to 77. The Indian appropriation bill was reported and made the special order for Tuesday. It appropriates \$3,000,000 against \$6,000,000 last year. The amount estimated for was \$5,000,000.

In the Senate, petitions were presented favoring an additional amendment granting female suffrage. A bill was reported to encourage telegraphic communication between the Eastern and Western Continents. It gives the American and Asiatic Telegraphic Company the exclusive right, for fourteen years, to the telegraphic cable from a point in Washington Territory. Government vessels are to assist the enterprise. A bill to protect Congressmen from importunity and preserve the independence of the several departments; also, the census bill discussed, but without final action, adjourned.

The Senate Judiciary Committee will hear the conservative Republican delegation, on Wednesday, regarding Georgia. Trumbull has notified the Bullock delegation to be present.

The Senate Elections Committee has indefinitely postponed the matter of Segar, who claims a seat from the State of Virginia at large.

The death of the late Mr. Hoag was announced in both Houses to-day.

Despatches to Fish, from Havana, say one American citizen was killed and two wounded, yesterday. No particulars.

Internal revenue receipts to-day, \$247,000.

Twenty-seven cases of yellow fever have occurred on board the Seminole, but the disease is now abating and the cases are milder. The Seminole leaves Key West for Portsmouth, New Hampshire.

The case of Hepburn vs. Griswold, brought from the Court of Appeals of Kentucky, involving the legal tender law, was decided in the United States Supreme Court to-day. Chief Justice Chase delivered the opinion of the Court, sustaining the decision of the Court below, and holding that a contract made before the legal tender law could not be discharged in United States notes. The opinion is very long, and discusses at great length the powers of Congress. It holds that Congress had no right to make Government notes a legal tender for pre-existing private debts. It does not touch the question of contracts made since the law was passed. This opinion was concurred in by Mr. Justice Nelson, Justice Clifford and Justice Field. Mr. Justice Miller delivered the minority opinion, concurred in by Justice Swaine and Justice Davis, holding the law to be entirely constitutional; treating it principally as an incident to the war power. The President has nominated Joseph P. Bradley, of New Jersey, and William Strong, of Pennsylvania, Associate Justices of the Supreme Court.

The delegation of Georgians, composed of Conley, President of the State Senate, Speaker pro tem, Tweed, Judges Gibson, Parrott and Harrell, of the Superior Court, Representative Clift, Mr. John Rice and others, called on Grant this morning. The interview lasted an hour.

The political situation in Florida, though his first impressions were that the action of the Legislature, previous to the expulsion of the colored members, was legal and binding, and the election of the Senators was to hold good, he was satisfied, after more mature reflection, that the present legislative organization was the first, and that all action should be commenced *de novo*. He inquired who the Republicans would elect Senators, to which the delegation responded that no nominations had yet been made, but that they would probably be made on Monday, and the election held on Tuesday. No doubt but what they will be loyal Republicans. The President said both he and Sherman had entire confidence in Terry, and he would fully advise them of the situation in a few days, as he would be here on public business. The delegation also expressed confidence in Terry's judgment and ability.

Domestic News.

AUGUSTA, February 7.—Senators Hill, Bryant, Caldwell, Holden and other Republicans, opposed to Governor Bullock and his policy, are on their way to Washington, to represent the condition of affairs in Georgia to Congress. Bryant says the object of the delegation is to show that Governor Bullock has violated the reconstruction laws, and that the Legislature, as now organized, is illegal, and that several persons are allowed seats in the Legislature who are not entitled to them, and that if Congress sustains Bullock, the Republican party in Georgia will be destroyed. The delegation represents the conservative wing of the Republicans in this State, and repudiate all political affiliation with the Democratic party.

TERRE HAUTE, IND., February 4.—The most intense excitement prevails in Clark County in consequence of the discovery of gold on Big Creek, about twenty miles from this city. A lately returned Californian, a miner of eighteen years' experience, has been for some days prospecting in the ravines along the creek, and in every handful of earth he has found gold in paying quantities. The people of that section are wild with the gold mania, and are leaving all other business to search for the precious metal.

CHICAGO, February 7.—Extensive smuggling by mail has been discovered. Among the packages seized were twelve dozen hymn-books, addressed to "Brigham Young, Salt Lake."

CINCINNATI, February 7.—Dobbin's distillery at Dayton has been seized. Dobbin refused to pay the tax, in order to test the legality of the forty-eight hour fermentation rule.

MONTGOMERY, February 7.—The Senate Alabama and Chattanooga Railroad bill passed the House, with the amendment that \$2,000,000 of State bonds should be loaned in place of \$3,000,000, as was provided in the original Senate bill. The Senate will undoubtedly concur in the House amendment.

MACON, February 7.—Great indignation is manifested here by the people over the statement of the *Intelligencer*, a pretended Democratic paper, that they endorse the infamous designs of the Bullock faction. The *Intelligencer* is in the pay of Bullock. The people ask Congress to give them the benefit of a fair construction of the Act to promote reconstruction and save them from plunder and ruin, and to carry out their own Act in good faith.

SAVANNAH, February 7.—The steamship Oriental, from Boston, to-day towed in port the British brig Helen, from New York for Wilmington, N. C. The Helen was dismasted off North Carolina coast in the late gale.

CHARLESTON, February 7.—Arrived—schooners Onida, New York; Emily Curtis, Wilmington, Delaware; Leila, New York; A. H. Whitmore, Norfolk; J. B. Vanduzen, Philadelphia; steamer Tennessee, New York.

FINANCIAL AND COMMERCIAL.

COLUMBIA, S. C., February 7.—Sales of cotton to-day about 50 bales—middlings—@—.

Bonds 87 1/2. **PARIS, February 7.**—The Bourse opened dull—rentes 73 and 30. **LIVERPOOL, February 7.**—Noon.—Cotton opened quiet and steady—uplands 11 1/2; Orleans 11 1/4/11 1/2.

Brick Pomeroy was thrown from his carriage, in Central Park, a few days ago, and narrowly escaped with his life. The accident happened near the spot where Peter Cagger was killed by a similar accident last year.

John Wanamaker, it is stated, struck a negro in Rock Hill, New Jersey, with his fist, Tuesday night, killing him instantly, and the father of Wanamaker, hearing of the homicide, lost his reason.

The Chicago Times says: "Farnsworth is after Butler. Bingham is after Butler. Dawes is after Butler. The devil, too, is after Butler."

A conspiracy has been discovered in the City of Mexico, in favor of Santa Anna. The ring-leaders have been arrested.

On Monday night, two men, charged with rape, were taken from the Springfield (Ky.) jail, by an armed mob, and hanged.

The body of an unknown infant was found floating off Charleston, on Sunday.

A STEUBURN FACT.—There is scarcely any disease in which purgative medicines are not more or less required, and much suffering might be prevented were they more generally used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious diseases, which might have been avoided by a timely use of Cathartic Medicines. For this purpose, Dr. Turt's VEGETABLE LIVER PILLS are confidently recommended; they are mild, safe, prompt and uniform in their action. They contain no Mercury. Persons may eat and drink as usual, and they may be taken at any time. F8 6

THE DEMAND TELLS THE STORY.—From all directions, orders for PHALON'S VITALIA OR SALVATION FOR THE HAIR come pouring in. All the noxious dyes, &c., go down before it. A year hence they will be unmarketable. The ladies say it is as pleasant to use as a perfumed toilet water, and it is as transparent as crystal. Nothing else reproduces so perfectly the original hue of the hair. F8 13

St. Valentine's Day is Coming. CALL at BRYAN & McCARTER'S Bookstore and please your Valentine. Comic and Sentimental VALENTINES, 1,000 for sale. Call early, at BRYAN & McCARTER'S. Feb 8

Wanted. A TEACHER, to take charge of the Mill Creek Academy, located nine miles South-east of Columbia. An unmarried gentleman, of mature age, with a good education, and a good character, and a competent knowledge of the English language, and of the principles of teaching, and of the management of a school, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of the principles of science, and of the principles of art, and of the principles of commerce, and of the principles of industry, and of the principles of agriculture, and of the principles of domestic economy, and of the principles of book-keeping, and of the principles of surveying, and of the principles of mechanics, and of the principles of astronomy, and of the principles of geology, and of the principles of natural history, and of the principles of medicine, and of the principles of law, and of the principles of politics, and of the principles of ethics, and of the principles of religion, and of the principles of philosophy, and of
